

## Celebrating 5 years of growth; uniting the profession globally.

### Living Our Mission

With your support, the WNF has developed into a strong international organization with 66 members, spanning all 7 world regions. We have published more than 15 important documents, including 5 major papers in 2019 alone.

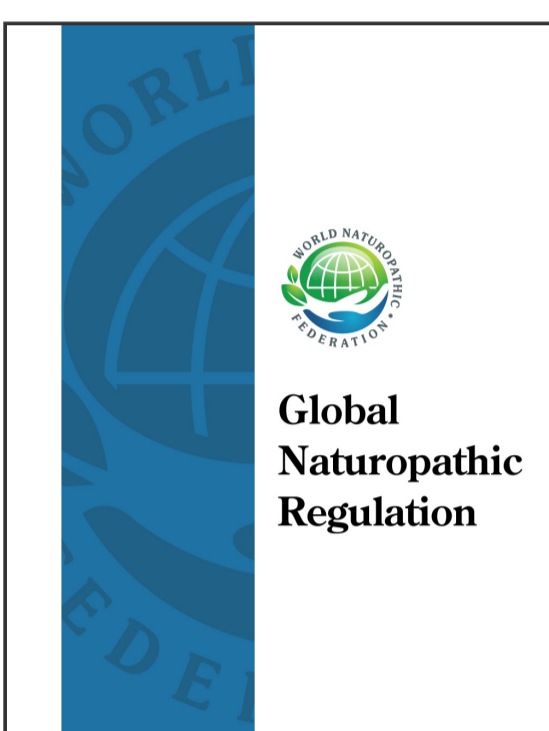

To celebrate the WNF's 5th Anniversary we wanted to take this opportunity to recap how we are fulfilling our commitment and Mission to our members.

#### Supporting Growth & Diversity

The naturopathic profession is defined by a consistent set of philosophies and principles, despite its diversity in education and regulatory standards.

#### Supporting Regulation

The WNF Global Naturopathic regulation report published in 2018 is a great resource for any naturopathic organization lobbying for regulation.

#### Promoting Educational Standards

In 2018 the WNF Education Committee completed a comprehensive review of Naturopathic Education and Credentials. Stay tuned for up-dates on naturopathic educational guidelines.

#### Encouraging Research

Analyzing the research written by naturopathic doctors/naturopaths confirms that the naturopathic profession is backed by a solid body of research.

#### Establishing A Naturopathic Database

The WNF website is a valuable resource. It contains links to: our 15 publications; WNF members; peer-reviewed journals; WNF Policy Statements as well as Naturopathic history, principles, modalities and regulation information.

#### Promoting Naturopathy Worldwide

In the last year, the WNF has reached over 40,000 people with our anti-microbial resistance social media posts. In 2020 we will be initiating a similar program focused on Environmental Risk Factors.

#### Our Largest Project to Date is the Health Technology Assessment on Naturopathy

The HTA-Naturopathy will be a 400+page book that outlines the safety, efficacy, costs, practice and research supporting a profession. An HTA is the standard that governments and the WHO use when evaluating a profession and determining how it compares to other health professions. The goal is to have the HTA-Naturopathy completed by the end of 2020 in order to apply for official collaboration with the World Health Organization in 2021.
